Warehouse work involving heavy labour, team coordination and long shifts

TECHNICAL SKILLS

- Client: React (with Context, Redux and Hooks), ES6 in general.
- Server: Node.js & Express mainly, Laravel secondary.
- DB: MySQL for RDBMS, MongoDB for document based.
- Cloud: AWS (Lambda, S3, AppSync, EC2, RDS, DynamoDB).
- Consistent use of dev tools (Git, Webpack, Babel, SASS... etc).
- Rest APIs, Authentication, Deployment, Testing.
- Familiar with Development methodologies (Agile, waterfall).
- Familiar with Docker, CI and dev ops concepts.
- Misc: Gatsby, Typescript, GraphQL, Apollo, Travis-CI, Firebase.

PROJECTS

Wholesale business website – geimexport.com
Laravel, Bootstrap

- Built and deployed a website to expose the company's imported products to potential customers in Algeria.
- Created an admin panel for managing site content.
- Exposed a REST API to be consumed by a mobile app.
- Created an authentication system for both admins (for site admin panel) and clients (for mobile app).

Client portal app – [El Wafa Client](#)
Ionic, Material Design

- Developed and published a hybrid app that consumes a Rest API to authenticate clients and display content.
- A messaging system between clients and website admins.
- A rating system for products and highlighting new ones.
- Sending notifications for new products and general feed.

Blog and podcast website – toastedbuns.co.uk
Gatsby, React, SASS, AWS

- A statically generated site with markdown blog posts.
- CI with Travis-CI to update site content when git repo updates.
- Served through an S3 bucket and cached with CloudFront.
